

SOUTHEAST NEIGHBORHOOD SCHOOL OF EXCELLENCE

2009-2010 Performance Analysis

Core Question 1: Is the educational program a success?

| 1.1. Is the school making adequate yearly academic progress (AYP), as measured by the Indiana Department of Education's system of accountability? | |
|---|---|
| STANDARD | School has met AYP across all student subgroups for the last two years. |

2009-10 Performance: Approaching Standard

Southeast Neighborhood School of Excellence (SENSE) did not achieve Adequate Yearly Progress (AYP) toward statewide academic goals set by the Indiana Department of Education (IDOE) in 2009-10. The IDOE determined that SENSE made AYP for the 2009-10 school year in 10 of the 13 subgroups for which it was evaluated. The chart below details the school's 2009-10 performance in each subgroup.

| Student Group | English | Mathematics | Participation English | Participation Math | Attendance |
|--------------------|---------|-------------|-----------------------|--------------------|------------|
| Overall | Y | N | Y | Y | Y |
| Black | Y | N | Y | Y | |
| Free/Reduced Lunch | Y | N | Y | Y | |

Blank areas indicate that the Indiana Department of Education concluded it was not possible to make a determination in the particular category for this school. Attendance rate determination is made only for "All students," not for subgroups.

| 1.2. Are students making substantial and adequate gains over time, as measured using value-added analysis? | |
|--|---|
| STANDARD | Value-added analysis indicates that more than 75%-89% of tested students made sufficient gains. |

2009-10 Performance: Does Not Meet Standard

In 2009-10, Mayor-sponsored charter schools administered the Northwest Evaluation Association's (NWEA) Measures of Academic Progress (MAP) test in reading, mathematics and

language in both the fall and spring. NWEA analyzed the results so the Mayor's Office could answer two questions about how much students learned during the 2009-10 academic year:

- Did students gain ground, lose ground or stay even compared to their state and national peers?
- What proportion of students made sufficient progress to reach proficiency over time?

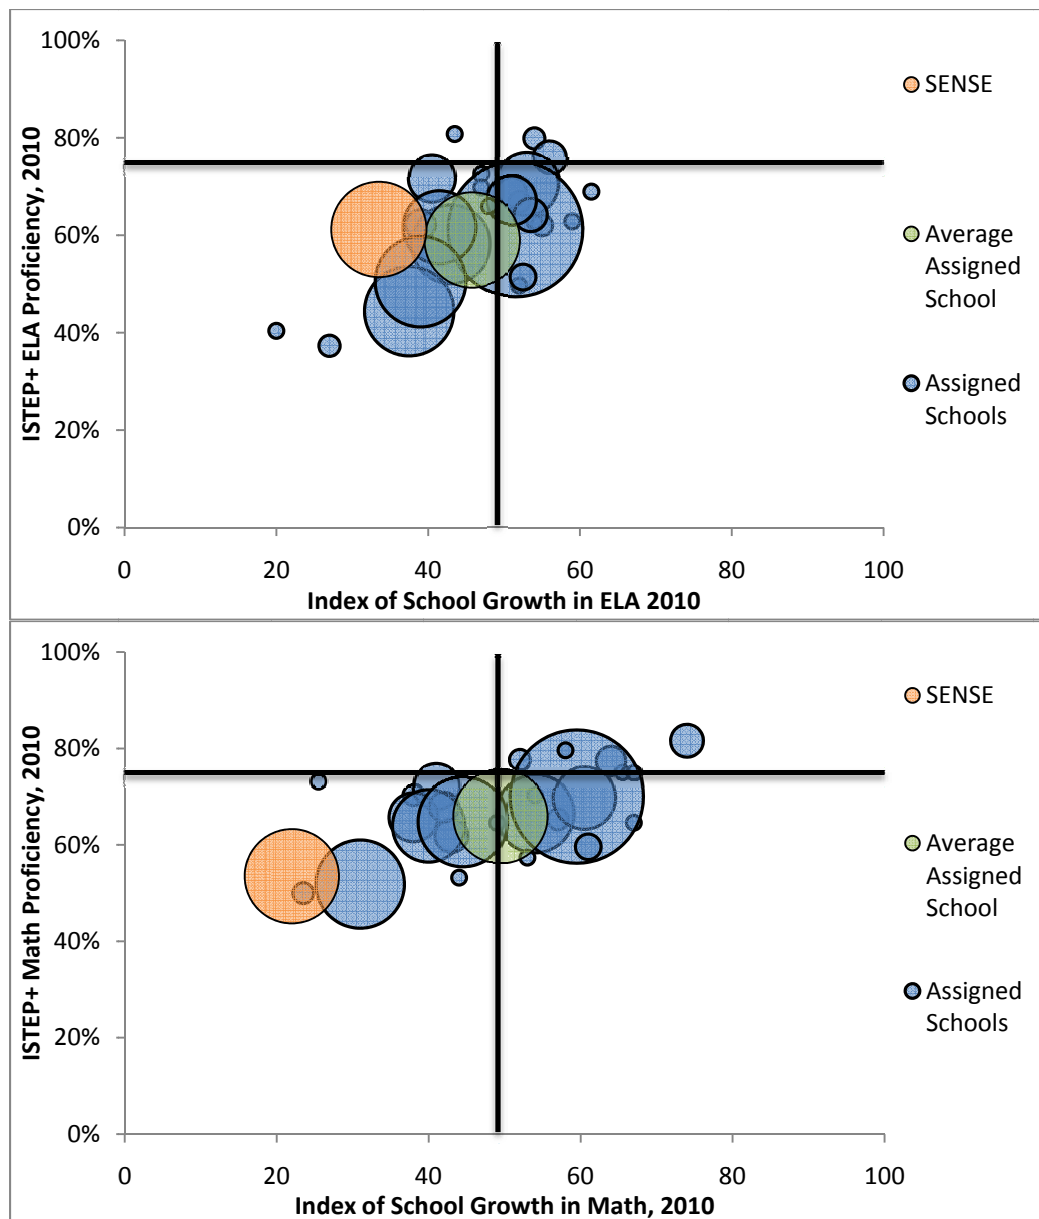

NWEA determined the target amount of growth each student needed to achieve between fall 2009 and spring 2010 in order to be on track to become proficient within two academic years. NWEA then compared the student's actual growth to this target. If the student's actual growth was greater than or equal to the target, the student was deemed to have made sufficient gains. NWEA calculated the percentage of SENSE students who made sufficient gains in each subject and grade, and determined that 41.5% of students made sufficient gains. The chart below details percentage of students at each grade level that made sufficient gains in each subject.

| Grade Level | LANGUAGE | MATH | READING | TOTAL |
|--------------------------|------------|------------|------------|------------|
| 2 | 23% | 14% | 34% | 24% |
| 3 | 39% | 68% | 55% | 54% |
| 4 | 33% | 34% | 42% | 38% |
| 5 | 50% | 35% | 55% | 46% |
| 6 | 50% | 43% | 62% | 52% |
| SCHOOLWIDE TOTALS | 33% | 39% | 49% | 42% |

| 1.3. Is the school outperforming schools that the students would have been assigned to attend? | |
|---|---|
| STANDARD | School's overall performance in terms of both proficiency and/or growth is generally as good as that of the schools the students would otherwise have been assigned to attend. |

2009-10 Performance: **Does Not Meet Standard**

The Mayor's Office compared the performance of SENSE to that of Marion County public schools students would have been assigned to attend, based on their place of residence. The overall proficiency and growth of students at SENSE was less than that of their peers in both English/Language Arts (ELA) and Mathematics. Therefore, in 2009-10, the school's performance does not meet standard for this indicator.

How to read these figures: Blue bubbles represent the traditional public school that students would have been assigned to attend if they did not attend SENSE. The size of each blue bubble is proportional to the number of SENSE students who would have attended that school. The horizontal axis line represents the average ISTEP+ performance in Indiana, while the vertical axis line represents 50th growth percentile. Schools located above the horizontal axis had better-than-average performance, while schools located to the right of the vertical axis showed, better-than-average improvement. The green bubble represents the average performance and improvement of all assigned schools. The orange bubble represents the performance of SENSE students.

| 1.4. Is the school meeting its school-specific educational goals? | |
|---|--|
| STANDARD | School has clearly met its school-specific educational goal. |

Not applicable. The school did not have school-specific educational goals to be evaluated in 2009-10.
